

# Repository Reorganization Summary

## Repository Reorganization Summary

### **\*\*Overview\*\***

- Restructured into four directories: ``frontend``, ``backend``, ``data``, and ``workspace``
- Removed legacy packages, redundant folders, empty dotfiles, and duplicate code

### **\*\*Key Changes\*\***

#### 1. **\*\*Backend Architecture\*\***

- Consolidated ``app/`` and ``ai_llms/`` into ``backend/``
- AI components organized under ``backend/ai/``
- RAG, embeddings, vectorstores, and ingestion modules in dedicated subdirectories
- Unified FastAPI routes in ``backend/api/routes.py`` with entry point in ``main.py``

#### 2. **\*\*Frontend Architecture\*\***

- Flattened ``frontend/sovereign_ai/`` directly into ``frontend/``
- Removed nested ``.git`` directory
- Verified clean production build using Vite

#### 3. **\*\*Workspace & Data\*\***

- Standardized subdirectories: ``documents/``, ``input/``, ``projects/``, ``output/``, ``sandbox/``
- Moved valid artifacts from root ``output/`` to ``workspace/output/``
- Added ``.gitkeep`` for empty directories and updated ``.gitignore``

#### 4. **\*\*Code Optimization\*\***

- Removed obsolete 0-byte dotfiles (``.bashrc``, ``.zshrc``, ``.idea``, etc.)
- Simplified comments/docstrings
- Cleaned test discovery; all 46 test cases pass

### **\*\*Verification\*\***

- Frontend: ``npm run build`` completed in 227ms with no errors
- Backend: 46 unit/integration tests executed with 0 failures

### **\*\*Directories\*\***

- ``frontend``: React application code

- ``backend``: Python API and AI components
- ``data``: Benchmarking and test documents
- ``workspace``: Operational files and outputs
