

Handwriting

Handwriting is the personal and unique style of writing created by a person using a hand-held tool like a pen, pencil, or digital stylus.

Core Styles

- Print (Block letters): Separate, unconnected letters.
- Cursive: Connected letters designed for faster flow.

Distinction: Different from formal calligraphy or printed typefaces.

Uses and Benefits

- Identity: Used to verify who wrote a document because each person's style is unique.
- Cognitive health: Writing by hand builds fine
